

SHAPING IROPE'S DIGITAL FUTURE

Introduction to the Artificial Intelligence Act proposal

Gabriele Mazzini

DG CNECT, European Commission

Intelligenza artificiale: definizioni, etica, strategia, prospettive, FAST 4 luglio 2023

Package on Al April 2021

- Communication: "Fostering a European approach to Al"
- Coordinated Plan on Al 2021 review
- Proposal for Artificial Intelligence Act

Ecosystem of excellence

Ecosystem of trust

- R&D&I
- Testing and experimentation facilities
- Digital Innovation Hubs
- Skills and talent

through

- European programmes and national activities
- Creation of synergies in the Coordinated Plan on Al

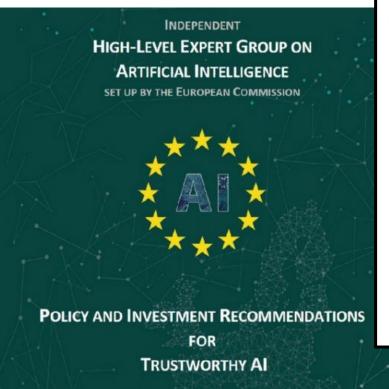

New regulatory proposal

"..artificial intelligence will open up new worlds for us.
But this world also needs rules."

Background -2018-2019

Brussels, 25.4.2018 COM(2018) 237 final

COMMUNICATION FROM THE COMMISSION TO THE EUROPEAN PARLIAMENT, THE EUROPEAN COUNCIL, THE COUNCIL, THE EUROPEAN ECONOMIC AND SOCIAL COMMITTEE AND THE COMMITTEE OF THE REGIONS

Artificial Intelligence for Europe

{SWD(2018) 137 final}

The European Commission's

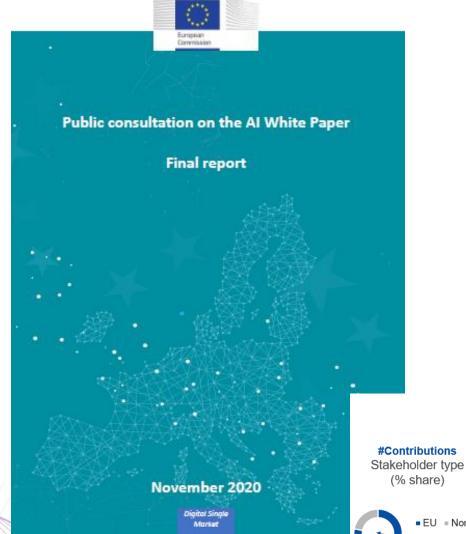

HIGH-LEVEL EXPERT GROUP ON ARTIFICIAL INTELLIGENCE

DRAFT
ETHICS GUIDELINES
FOR TRUSTWORTHY AI

Background - 2020

Brussels, 19.2.2020 COM(2020) 65 final

WHITE PAPER

On Artificial Intelligence - A European approach to excellence and trust

406 Citizens (33%)

352

(29%)

152 Academia (13%)

73 Public authorities (6%)

72 Other (6%)

Al brings benefits to consumers, business and the society, but creates risks

Public consultation

Risks to fundamental rights

- ▶ 90% of respondents to the public consultation worry about AI breaching fundamental rights (ex. biometric identification)
- ▶ 87% about discriminatory outcomes

Risks to safety

82% of respondents to the public consultation are concerned that AI endangers safety (ex. AI in medical devices)

AI REGULATION

> 75% said that there is a need for new legislation or that current legislation may have gaps

Key regulatory concepts

Internal market legislation (mainly based on Art. 114 TFEU)

- "Classic" internal market rules for the placing on the market and putting into service of AI systems
- Aligned to vast EU acquis on product safety which shall be jointly applied (e.g. AI embedded in products)

Layered risk-based approach

- ▶ No regulation of the technology as such, but of **concrete use cases**
- Covers risks to health, safety and fundamental rights

Level playing field for EU and non-EU players

Independent of origin of producer or user

Definition of Al

"a software that is developed with one or more of the techniques and approaches listed in Annex I and can, for a given set of humandefined objectives, generate outputs such as content, predictions, recommendations, or decisions influencing the environments they interact with"

"a machine-based system that can, for a given set of humandefined objectives, make predictions, recommendations, or decisions influencing real or virtual environments"

(OECD Council Recommendation on Artificial Intelligence, May 2019)

(Art. 3(1) Al Act)

Risk-based approach

*Not mutually

exclusive

The higher the risk the stricter the rules

No regulation of the technology as such

Unacceptable risk

e.g. social scoring

Prohibited

High risk

e.g. recruitment, medical devices

'Transparency' risk

'Impersonation' (bots), deep fake **Permitted** subject to compliance with AI requirements and ex-ante conformity assessment

Permitted but subject to information/transparency obligations

Minimal or no risk — Permitted with no restrictions

Al that contradicts EU values is prohibited (Title II, Art. 5)

Subliminal manipulation

resulting in physical/ psychological harm

Exploitation of vulnerabilities

resulting in physical/psychological harm

'Social scoring' by public authorities

'Real-time' remote biometric identification for law enforcement purposes in publicly accessible spaces (with exceptions)

Remote biometric identification (RBI)

<u>Use</u> of real-time RBI systems for law enforcement (Art. 5)

Prohibition of use for law enforcement purposes in publicly accessible spaces with exceptions:

- Search for victims of crime
- Threat to life or physical integrity or of terrorism
- Serious crime (EU Arrest Warrant)

Ex-ante authorisation by judicial authority or independent administrative body

Putting on the market of RBI systems (real-time and ex-post)

Ex ante third party conformity assessment

- Enhanced logging requirements
 - "Four eyes" principle

JAR

High-risk Artificial Intelligence Systems (Title III, Chapter 1 & Annexes II and III)

1 SAFETY COMPONENTS OF REGULATED PRODUCTS

(e.g. medical devices, machinery) which are subject to third-party assessment under the relevant sectorial legislation

New Legislative Framework - Section A

'Old Approach' - Section B

2 CERTAIN (STAND-ALONE) AI SYSTEMS IN THE FOLLOWING AREAS

- Biometric identification and categorisation of natural persons
- Management and operation of critical infrastructure
- Education and vocational training
- Employment and workers management, access to self-employment

- Access to and enjoyment of essential private services and public services and benefits
- ✓ Law enforcement
- Migration, asylum and border control management
- Administration of justice and democratic processes

Requirements for high-risk AI systems (Title III, Chapter 2)

Establish and implement risk management system

&

in light of the intended purpose of the Al system

Use high-quality training, validation and testing data (relevant, representative etc.)

Draw up **technical documentation** & set up **logging capabilities** (traceability & auditability)

Ensure appropriate degree of **transparency** and provide users with **information** on capabilities and limitations of the system & how to use it

Ensure human oversight (measures built into the system and/or to be implemented by users)

Ensure robustness, accuracy and cybersecurity

CE marking and process (Title III, chapter 4, art. 49.)

CE marking = indication that product complies with requirements of applicable Union legislation

In order to affix a CE marking, provider shall undertake the following steps:

Determine whether its Al system is classified as high-risk under the new Al Regulation

Ensure design and development of AI systems are in compliance with the AI Regulation

Undergo conformity assessment procedure to assess and demonstrate compliance

PLACING ON THE MARKET or PUTTING INTO SERVICE

Affix the CE marking to the system and sign a declaration of conformity

Provider obligations

- ► Establish and implement quality management system in its organisation
- ► Register AI system in EU database
- ► Conduct **post-market monitoring**
- ► Collaborate with market surveillance authorities

User obligations

- ▶ Operate AI system in accordance with **instructions of use**
- ► Ensure **human oversight** when using of AI system
- ► Monitor operation for possible risks
- ▶ Inform the provider or distributor about any serious incident or any malfunctioning
- ► Existing legal obligations continue to apply (e.g. under GDPR)

Most Al systems will not be high-risk (Titles IV, IX)

Transparency obligations for certain AI systems (Art. 52)

- Notify humans that they are interacting with an AI system unless this is evident
- Notify humans that they are exposed to emotional recognition or biometric categorisation systems
- Apply label to deep fakes

MINIMAL OR NO RISK

Possible voluntary codes of conduct (Art. 69)

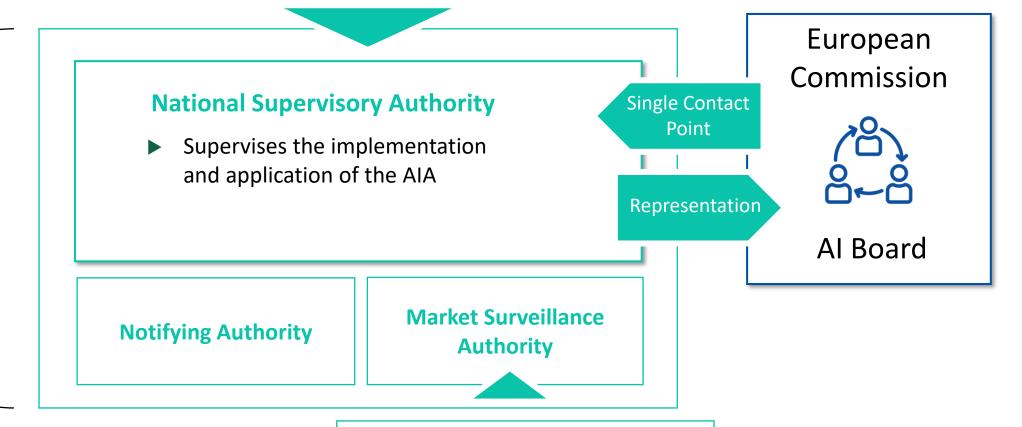

- No mandatory obligations
- Commission and Board to encourage drawing up of codes of conduct (voluntary application of requirements for high-risk AI systems or other requirements)

Governance: national level

Member State designates

National Competent Authority/ies

Cooperate with national public authorities supervising Union law protecting fundamental rights

Governance: EU level

Other national authorities may be ooo invited for issues of relevance for them

European Al Board

Structure and mandate (artt. 56 and 57)

- contribute to **effective cooperation** of national supervisory authorities and EC
- contribute to guidance and analysis
- assist in ensuring the consistent application of the AI Regulation

Commission

OOO The Board may invite external experts and observers

European Commission

Secretariat of the Board

- Chair the Board
- Provide administrative and analytical support

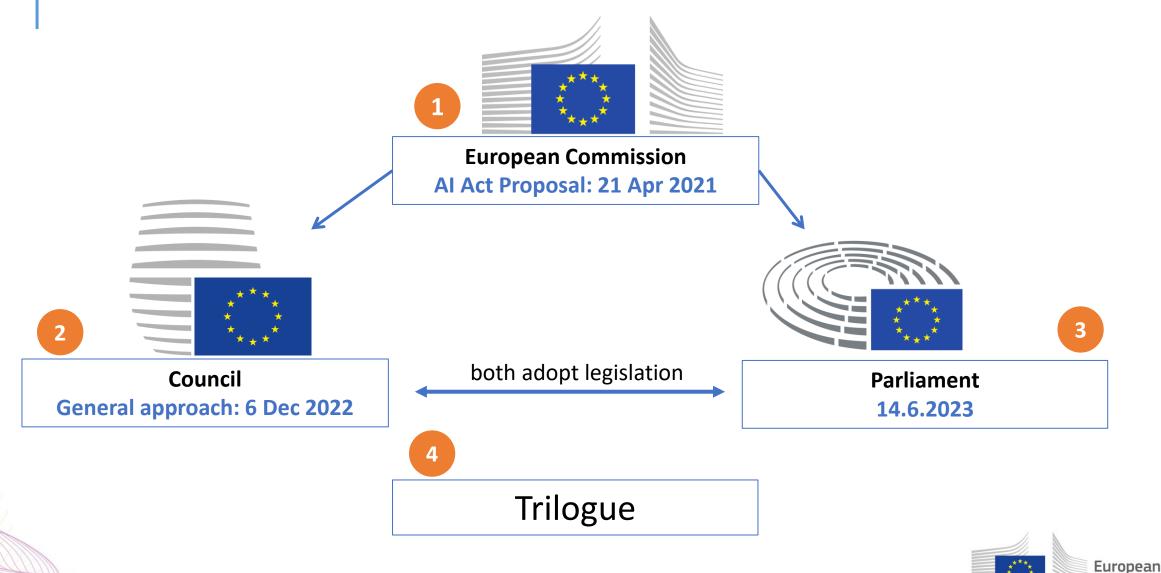

Subgroups

for the purpose of examining specific questions

Ordinary legislative procedure

Commission

State of play: ordinary legislative procedure

Parliament

- Joint competence of IMCO & LIBE committees: draft report from 20 April.
- In addition, five other committees have partial competence on different parts of the file: JURI & ITRE (exclusive), CULT (shared), ENVI & TRAN (opinion).

Council

- PT Presidency
- > SI Presidency
- > FR Presidency (full first reading)
- CZ Presidency (General Approach)

Some issues under discussion:

- Definition of AI
- Prohibitions (notably biometrics)
- General-purpose AI systems
- List of high-risk AI systems

- Enforcement mechanism and governance
 - Al Board and role of the Commission
- Users obligations

Timelines

2

1-2-3

Agreement btw European Parliament and Council

Once adopted, there will be 2 years of transitional period before the Regulation becomes directly applicable across the EU.

In parallel, harmonized standards should be elaborated
