

GreenEnergy:Community Expression of Interest

From January – June 2024 registered participants of the GreenEnergy:Community who are looking for project, technology or business partners will have the unique opportunity to present their organisations, skills and experience or project ideas to the GreenEnergy: community in the form of recorded pitches. They will be uploaded to the community and will be visible to registered participants. This will allow you to present yourself to a broad and growing audience and to initiate B2B meetings and professional dialogue.

There are two options:

1. The pitches will be recorded by us using Teams, Zoom or BigBlueButton and then uploaded via youtube and linked to the GreenEnergy: Community (B2match) or
2. You create your own video presentation in mp4 formate that will be accepted by us after technical and content checks.

Please be aware that you have a maximum of 3 minutes for your pitch presentation. Slides/Pitch should be in English.

I am interested in presenting my company in the form of a recorded pitch.
